

EFFERBAKTOL 2 GRANULÉS

Effervescent granules of potassium metabisulfite
2 g doses of pure SO₂
Optimised sulfiting of barrels and small containers

CHARACTERISTICS

Thanks to their pre-adjusted SO₂ content, their original effervescent granule formula, and their ease of use, **EFFERBAKTOL 2 GRANULÉS** enables completely uniform, reliable and efficient sulfiting of small containers (barrels, ageing containers and small tanks).

Every bag of EFFERBAKTOL 2 GRANULÉS contains 2 grams of pure SO₂.

On contact with must or wine, **EFFERBAKTOL 2 GRANULÉS** naturally effervesces. Its effervescent granules enable better dispersion and uniformity of sulfiting.

EFFERBAKTOL 2 GRANULÉS is environmentally friendly:

- significant reduction in the volume of waste compared to liquid products: a can with bisulfite residues qualifies as hazardous industrial waste.
- Better working conditions for users.

APPLICATIONS

- Bags of **EFFERBAKTOL 2 GRANULÉS** contain pre-adjusted SO₂ quantities and are ready to use.
- **EFFERBAKTOL 2 GRANULÉS**: release 2 g of SO₂ per bag.
- They are specifically suited for SO₂ management in barrels, ageing containers or small tanks (variable capacity tanks).
- They are equally recommended for the protection of musts in small containers.
- Thanks to its composition and to its granule form, **EFFERBAKTOL 2 GRANULÉS** avoids, in most cases, the tedious stage of a pump-over or mixing after sulfiting.

For sulfiting grapes, musts and wines in bigger containers (presses, harvest bins, large tanks, etc.) **EFFERBAKTOL 50** or **EFFERBAKTOL 100 GRANULÉS** should be used.

DOSAGE

Assess the number of bags required for sulfiting according to the following example:

Example:

Target: increase the wine SO₂ concentration by 40 mg/L.
4 g of SO₂ per hectolitre of wine is required.

Solution:

2 bags of **EFFERBAKTOL 2 GRANULES** should be added per hL.

Maximum legal dose: see current regulations on the maximum legal dose of total SO₂ pertaining to different types of wines (white, rosé, red, sweet wines, etc.)

20/2014 – 1/2

INSTRUCTIONS FOR USE

For barrel sulfiting, sprinkle **EFFERBAKTOL 2 GRANULÉS** through the bung hole to prevent the barrel from bubbling over.

For tanks, sprinkle granules on wine from the top.

For uniform SO₂ distribution there is no need for stirring.

Precautions for use:

Product for oenological and specifically professional use.

Use in accordance with current regulations.

INGREDIENTS

Potassium metabisulfite E 224 (75%), potassium bicarbonate E 501 (25%)

PACKAGING

Boxes of 40 bags.

STORAGE

Store unopened, sealed packaging away from light in a dry, odour-free environment.

Once opened use rapidly.

Use before best-by date stamped on packaging.
